Name of parts

- ① **Strap hole:** attaches supplied neck strap
- ② **Headphone socket:** connects headphones / remote control connector
- ③ **LED:** blinks slowly during charging; blinks quickly during file transfer
- ④ **LCD display:** dynamically displays track and artist information, player information and file transfer status
- ⑤ **USB port:** connects to computer / battery pack
- ⑥ **USB cover:** protects USB port
- ⑦ **Battery door:** open to install 1 AAA battery
- ⑧ **Battery pack:** provides back-up power

Batteries contain chemical substances, so they should be disposed of properly.

Remote control

- 1 Headphones connector
- 2 Volume up + : for increasing volume
Volume down - : for decreasing volume
- 3 Skip / Super Skip ►► : for forward scrolling and browsing
Back / Super Back ◄◄ : for backward scrolling and browsing
- 4 Power ►|| : Power on / off and Play / Pause
- 5 Remote Control connector

Connecting your remote control

- 1 Thread the neck strap through the hole.
- 2 Insert the remote control connector to your player.
- 3 Insert the headphone connector to the headphone socket.

Preparations

Installing software

Please insert the by-packed CD into your CDROM drive and follow on screen instructions to complete driver and software installation.

Powering your player

Your player has a built-in USB rechargeable battery. To charge your player; switch on your computer. Detach the USB cover. Connect your player directly to your computer's USB port. Charge your player until the **LED** lights up and stops blinking (approximately 4.5 hours). Keep your computer switched on during charging.

ATTENTION!

WINDOWS 98SE users:

DO NOT CONNECT your player to the PC **BEFORE** driver installation.

MAC users:

DO NOT CONNECT your player to your keyboard's USB port. It doesn't have sufficient power to detect your player.

TIP

- You can also use the supplied battery module to provide instant power to your player: When your player is charged and the battery module is in use, your player will first use up the power from the external battery.
- You can organize your music on your computer while your player is charging. (See page 9 for more information)

USB Connection

Your player will appear as a new USB mass storage in **Windows Explorer** on PC or **Finder** on Mac when USB connected. You can use your player as a mass storage device for any data files.

Transferring files and music tracks

Click and highlight one or more files or music tracks to transfer between your player and your computer. Use drag and drop actions to complete your transfer. The green LED on your player blinks during file transfer.

PC users: Disconnect player safely from your PC by clicking  on the task bar to avoid file error.

WINDOWS 98SE users: There is no  icon. Simply disconnect player after file transfer completes.)

MAC users: Drag and drop your player into **Trash** before disconnecting.

About upgrades

For best interaction between your player and your computer, check www.philips.com/support for the latest upgrades available. (See page 11 for more information)

Formatting your player

PC users: Only format your player with FAT file system.

MAC users: Only format your player with the supplied format application.

IMPORTANT! KEEP A COPY OF YOUR ORIGINAL FILES!

Please keep a copy of the original files transferred to your player. Philips is not responsible for any loss of content if the product becomes damaged or not readable.

Player controls and LCD display

Basic Operation	Control to press
Switch on / off	Press and hold ► for 2 seconds
Play music	Press ►
Pause music	Press ► during playback
Change volume	Press + to increase or - to decrease
Go to next or previous track	Press ►► for next and ◀◀ for previous
Superskip	Press and hold ►► to skip forward or ◀◀ to skip backward

Your player has an intuitive display to show various information

 Internal battery level	 Battery low
 External battery in use	 Volume control
 Folder number	 Track number
 Music playing	 Music paused
 Skipping backward	 Skipping forward

TIP

- Your player can display music information in Roman-alphabetic languages, Simplified Chinese, Traditional Chinese, Japanese and Korean. You can change the setting via the **Firmware Manager** application supplied in your by-packed CD.

Customizing playback order

Your player can play music files according to how you arrange them in folders, as shown in the following diagram:

TIP

- Your player can support up to 3 layers of sub-folders.
- Music files inside folders will play before those in the root directory.
- You can also use **MUSICMATCH** (supplied in the by-packed CD) for music transfer and music ripping. Please visit www.musicmatch.com for more information.

Setting display language

Your player can display music information in Roman-alphabetic languages, Simplified Chinese, Traditional Chinese, Japanese and Korean. You can change the setting via the **Firmware Manager** application supplied in your by-packed CD.

- 1 Please insert the by-packed CD into your CDROM drive and follow on screen instructions to complete driver and software installation.
- 2 Connect your player to your computer. Back up all the files / music on your player.
Your player will be formatted before the upgrade.
- 3 **PC Users:** Launch **Firmware Manager** from **Start** / Desktop shortcut.
MAC Users: Launch Firmware Manager from its application folder / Desktop shortcut.
- 4 Select your preferred language from Firmware Manager.
Follow on screen instructions to complete language setting.

IMPORTANT! KEEP A COPY OF YOUR ORIGINAL FILES!

Please keep a copy of the original files transferred to your player. Philips is not responsible for any loss of content if the product becomes damaged or not readable.

TIP

For the best interaction between your player and your computer, check www.philips.com/support for the latest upgrades available. Save the upgrade file in the folder where **Firmware Manager** is installed. Unzip before you install the upgrade.

Upgrade firmware

For the best interaction between your player and your computer, check www.philips.com/support for the latest upgrades available. Save the upgrade file in the folder where **Firmware Manager** is installed. Unzip before you install the upgrade.

- 1 Connect your player to your computer. Back up all the files / music on your player.
Your player will be formatted before the upgrade.
- 2 PC Users: Launch **Firmware Manager** from **Start** / Desktop shortcut.
MAC Users: Launch Firmware Manager from its application folder / Desktop shortcut.
- 3 If the firmware version available is newer than that of your player, click **Continue** to start the firmware installation process.

Restore firmware

If your player does not react to any key-press, do the following:

- 1 PC Users: Launch **Firmware Manager** from **Start** / Desktop shortcut.
MAC Users: Launch Firmware Manager from its application folder / Desktop shortcut.
- 2 Press and hold ►|| and connect your player directly to your computer's USB port.
Do NOT release ►|| until you are prompted to do so.
- 3 Firmware restore is complete when you see the main screen of Firmware Manager.
You can perform language selection and / or upgrades as described above.

Troubleshooting

If a fault occurs, first check the points listed. For further help and other troubleshooting tips, please also check out FAQ for your player at www.philips.com/support. If you are unable to find a solution from these hints, consult your dealer or service center.

WARNING:

Under no circumstances should you try to repair the set yourself, as this will invalidate the warranty.

Problem	Cause	Solution
Cannot hear music	Battery drained	Charge the battery (see <i>step 1, page 2</i>)
	Auto power off	Your player automatically powers off 60 seconds after music is paused and no keys are pressed. Press and hold ► to power ON again.
Auto power off	Loose connection	Check headphones / remote control connection
No player response	Firmware corrupted	Restore firmware (see <i>page 11</i>)
USB doesn't work	Loose connection	Check connection
	Wrong OS version	Your operation system must be Windows 98SE or Mac OS 9.2.2 or 10.2.6 or later
	USB driver not installed	Windows 98SE user only: install the USB driver provided in by-packed CD
	Player connected to Mac keyboard	Connect your player to another USB port
Cannot play track	Track format not supported	Your player is not able to play AAC encrypted or WMA songs bought from the internet.

Safety and maintenance

- **Child safety:** The remote control neckstrap is not a toy. Special care should be taken if handled by young children. Avoid placing the neckstrap around the neck of a child to prevent strangulation!

Take care when using headphones

- **Hearing safety:** Listen at a moderate volume. Using headphones at high volume can impair your hearing.
- **Traffic safety:** Do not use while driving or cycling as you may cause an accident.

CAUTION!

To avoid damage or malfunction:

- Do not twist or bend the remote control neckstrap as this is a precision electronic accessory.
- Do not expose to excessive heat caused by heating equipment or direct sunlight.
- Do not drop your player or allow objects to fall on it. Strong shocks and vibrations may cause malfunction.
- This product is not waterproof: do not allow your player or remote control neck strap to be submersed in water; and avoid exposing the USB socket to water. Water entering the player may cause major damage.
- Do not use any cleaning agents containing alcohol, ammonia, benzene, or abrasives as these may harm the player and neck strap. To clean, use a soft damp cloth.
- Active mobile phones & strong magnetic fields in the vicinity may cause interference.
- The supplied software CD-ROM is not an audio CD. Playing CD-ROMs on audio equipment may damage your audio equipment!

Environmental information

We have reduced the packaging to its minimum and made it easy to separate into mono materials: cardboard, PS, PE.

Your set consists of material which can be recycled if disassembled by a specialized company. Please observe the local regulations to dispose of packaging, exhausted batteries and old equipment.

Copyright information

All other brand and product names are trademarks of their respective companies or organizations.

Unauthorized duplication of any recordings downloaded from the internet or made from audio CDs is a violation of copyright laws and international treaties.

Modifications

Modifications not authorized by the manufacturer may void users authority to operate this device.

Notice for the USA

This equipment has been tested and found to comply with the limits for a **Class B** digital device, pursuant to **part 15** of the **FCC Rules**. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

Notice for Canada

This Class B digital apparatus complies with Canadian ICES-003.
